

I have just purchased a car that provides me with XM Satellite Radio. The variety and quality are truly outstanding!

The added benefit is that they also broadcast weather and traffic reports. This allows me to plan my driving routes when commuting.

I understand that the National Association of Broadcasters are concerned about the competition this represents to them. My answer to that is, do what any other company in America must do when faced with that situation....improve your service.

I respectfully request that the FCC reject the NAB's petition 04-160.

Very truly yours,

Samuel Bonfante
